

## Fonts

```
//Fonts Example  
//Mr.H.
```

```
/* Paste the following 3 lines into a sketch to list all fonts
```

```
size(200, 200);  
String[] fontList = PFont.list();  
printArray(fontList);  
*/
```

```
PFont f;  
PFont g;  
PFont h;  
PFont i;  
PFont j;  
PFont k;  
PFont l;
```

```
void setup(){  
  size(600,600);  
  //must declare each font to be used  
  f = createFont("Arial",16,true);  
  g = createFont("Tahoma-Bold",16,true);  
  h = createFont("Times-Italic",16,true);  
  i = createFont("TimesNewRoman",16,true);  
  j = createFont("Trebuchet-BoldItalic",16,true);  
  k = createFont("Verdana-Italic",16,true);  
  l = createFont("Zapfino",16,true);  
}
```

```
void draw(){  
  background(255);  
  fill(0);  
  textFont(f,48);  
  text("Hello",50,80);  
  textFont(g,48);  
  text("Hello",50,160);  
  textFont(h,48);  
  text("Hello",50,240);  
  textFont(i,48);  
  text("Hello",50,320);  
  textFont(j,48);  
  text("Hello",50,400);  
  textFont(k,48);  
  text("Hello",50,480);  
  textFont(l,48);  
  text("Hello",50,560);  
}
```
